

# useReducer()

## Component

(Event,  
request...)

Function dispatch

## Action

(Appelée helper  
method à quoi on  
assigne un type)

```
{type: 'DELETE_FILE'}
```

## Reducer

(Récupère le state initial, check le  
type de l'action choisit et renvoie un  
nouveau state

```
({state}, DELETE_FILE ) => new State  
DELETE_PICTURE
```

...

new state renvoyé
